

MONTHLY OSHA REPORT TO SENIOR MANAGEMENT

Listed below are DOE Reportable (OSHA Recordable) injuries and illnesses occurring at the NETL during the (approximate) one-month period of time (2/13/02 to 3/12/02) or previously not submitted. A brief description of each injury/illness with corrective action status is provided; injuries are separated into DOE and Contractor categories. The purpose of this report is to keep senior staff members abreast of the more serious injuries and illnesses occurring at the NETL.

Contractor Injuries/Illnesses

1. (February 14, 2002), An EG&G employee while walking across the gravel lot near Trailer 43, suffered a slip and fall injury. Initially it was determined that his injury only required First Aid; however, x-rays proved that he had suffered an avulsed fracture of his left ankle. He was fitted with an inflatable cast and he has undergone physical therapy for this injury. The employee was reminded to utilize the provided walkways when walking through the site.

DOE Injuries/Illnesses
